

November 8, 2016

Dear Sir or Madam,

Prof. Spevack has made art approachable and accessible to me in the most profound ways. Her web design class has shown me best practices that I've applied to countless projects for major brands.

Having taken Vector Art with Prof. Spevack gave me the fundamentals of digital artistry on par with an apprenticeship with a master digital artist. Most of all her collaborative teaching style made each class with her a real community. I still remember each classmate's unique artistic style and she was integral in bringing that out.

Prof. Spevack has honored me as CUNY Interdisciplinary BA mentor and an inspiration in real life. I can hardly list all the accomplishments her teaching has allowed me to achieve. Most recently I led a workshop on Virtual Reality at the MIT Media Lab, "DayDream with Unity": <http://www.realityvirtuallyhack.com/calendar/2016/9/9/daydream-with-unity>. Next week I'll be a featured speaker at devfestnyc.com.

Prof. Spevack is an asset to any educational system and I recommend her without hesitation.

Sincerely,

Lex Dreitser
